

FISHING LICENSE

You may have an opportunity to occasionally fish aboard on your trip. We have rods and gear you are welcome to use. Please note that fishing is not a focus of our trips, rather an extra activity.

If you would like to try your hand at catching something, you will need to purchase a saltwater fishing license before arriving aboard.

We highly recommend purchasing a license online, as we can't guarantee the availability of fishing licenses once your trip has started.

Each person who wishes to fish must purchase a separate licence.

Please note: *We currently only offer fishing on our trips in British Columbia.*

To purchase a fishing licence online, follow these steps:

For British Columbia, Canada trips:

1. Visit www.pac.dfo-mpo.gc.ca.
2. On the right menu, click **Get a Fishing Licence**.
3. Under Need a Licence? click **Recreational Fishing**.
4. Under Recreational Licences, click **B.C. Tidal Waters Sport Fishing Licence**.
5. Scroll down, and under New Fishers, click **Register Now** and continue, following the instructions on screen.
 - Buying a salmon stamp is a good idea in case you accidentally catch one, even if you don't plan on fishing for salmon.
 - Your fishing licence is good for all fish (if you purchase a salmon tag), as well as crabs and prawns.

Follow the directions carefully or your licence will not print out.

Remember to print the licence at the end and bring it with you.

You must bring your fishing license with you, as you are legally required to have it with you to be able to fish. Sorry, we cannot make any exceptions.

For Alaska and Gulf Islands trips:

If you are on one of our trips in travelling in Alaska or the Gulf Islands, please read: Due to the depleting fish stock we **will not** be offering fishing in Alaska or the Gulf Islands in efforts to not contribute to the overfishing of the area.
